1.Introduction

1.1 Purpose

This release document contains a description of new features, changes, improvements and/or bug fixes of this latest release.

Thank you for your interest in the release notes of VizX2. Should any of the described items be unclear or if you would like to receive more information on a specific update, for questions customer can reach out to ziuz.freshdesk.com

Please also read the release notes from previous versions if these versions were skipped in the upgrade process. These releases also contain new functions and fixes.

Although this document contains information on previous versions, please check the previous release note documents for more detailed information on new functionality. Release information prior to version 2.7.0 has been deleted from this document and can be found in older release notes.

1.2 Focus

The focus of the 2.9.2.79 release is on enhancing VizX Image functionality, improving stability and performance of the VizX Server, and updating the company name in the license information.

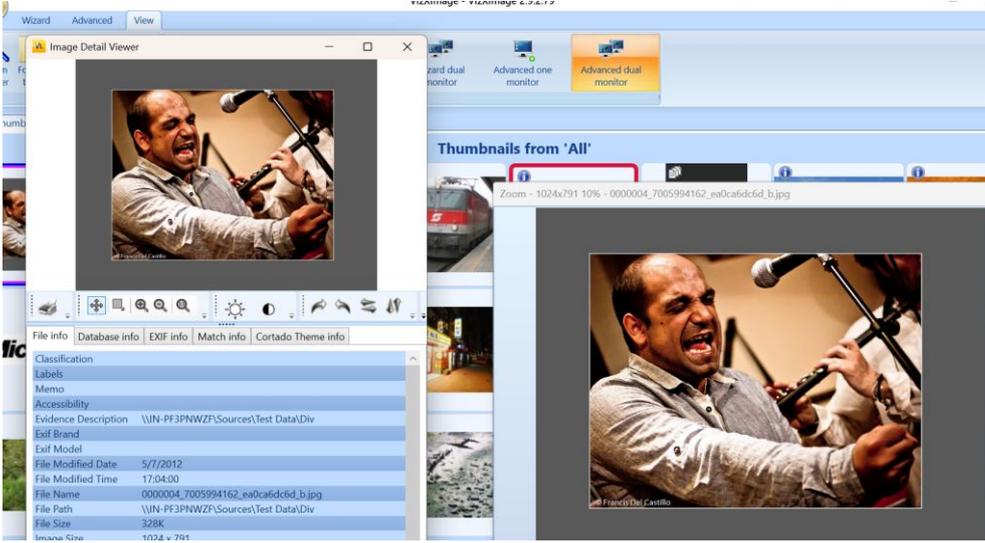

1.3 User Guides

The latest version of the VizX2 User Guide is included in the VizX2 Dashboard: "ZiuZ VizX 2.9.0 - User Guide v1.5"

The User Guide for the NCMEC Reports Module is available as separate document: "ZiuZ VizX 2.8.0 - NCMEC Reports - User Guide v1.5".

2. Release Notes

2.1 Functional changes

<u>BUG 331779</u>	[Freshdesk - 106163]: User Ausfall PP Offenburg
Previous situation:	The situation again is that two user accounts can no longer use VizXImage. In another case, error messages appear, if VizXImage is then called again. From the case, the application works.
New situation:	This issue is fixed now in this version
Screenshots:	 The screenshot displays the VizXImage application interface. At the top, there are tabs for 'Wizard', 'Advanced', and 'View'. Below these, there are buttons for 'Wizard dual monitor', 'Advanced one monitor', and 'Advanced dual monitor'. The main area shows a 'Thumbnails from 'All'' section with a zoomed-in image of a man playing a guitar. An 'Image Detail Viewer' window is open, showing the same image. Below the image, there is a 'File info' panel with the following details: Classification, Labels, Memo, Accessibility, Evidence Description (\WIN-PF3PNWZF\Sources\Test Data\Div), Exif Brand, Exif Model, File Modified Date (5/7/2012), File Modified Time (17:04:00), File Name (0000004_7005994162_ea0cafdcd_b.jpg), File Path (\WIN-PF3PNWZF\Sources\Test Data\Div), File Size (328K), and Image Size (1124 x 761).
Added to build:	2.9.2.79

BUG 303104	License tool Company Name bug in VizX Prof. v78
Previous situation:	When entering the company name, it was not appearing in license information page
New situation:	This issue is fix now in this build
Screenshots:	 <p>VizXDashboard Version - 2.9.2.79 Professional license, valid until: 24-07-2025, for company `ARB_Decos` ©2005-2025 ZiuZ Forensic. All rights reserved. Added to build:	2.9.2.79

BUG 331749	[Freshdesk - 106353] : ZiuZ-Server (on Windows Server 2016) repeating critical crashes after Installation of ZiuZ Server Version 2.9.2.78
Previous situation:	After installing ZiuZ server version 2.9.2.78 there were repeated critical crashes on windows server 2016
New situation:	This issue is fixed now in this build
Screenshots:	
Added to build:	2.9.2.79

3. Test Results

The ZiuZ engineers have done functional tests according to the ZiuZ test protocols. The setup of the ZiuZ test appliances simulate the environment (both Professional and Teamwork editions) of the customers as much as possible. During the testing no critical issues have been found.
